Ability Summary

I'm a full-stack developer, with focus on back-end. I've made web apps using React, Node.JS, databases and JavaScript. I'm also a bot developer using JavaScript and GoLang, and I am proficient in Python.

Employment History

01/2024 - Current **AI Trainer**

DataAnnotations, Online, TX

As an AI trainer, I develop and refine the AI's capabilities to understand programming languages by designing prompts around specific fields, such as Python code and NodeJS libraries. I evaluate AI's model answers, providing feedback to teach it to code and follow instructions.

06/2022 - 08/2022 **Software Developer**

Kahuna Workforce Solutions, Houston, TX

Designed and developed a Microsoft teams App to integrate a workflow between Teams and Jira. The app would create and manage tickets, add comments and check status using your own Jira credentials, all from within Teams. The tickets could also be checked on Jira without having to go to the website.

08/2017 - 08/2020 **Software Developer**

Home Decor Outlet, Houston, TX

Worked with the team to set up more efficient, creative systems and solutions. Managed online presence, website development and maintenance, and created a full stack POS system with inventory tracking that integrated into the website. Improved organization and communication within the team to maintain adaptability and flexibility.

Education History
